QUOSPHERE
INTELLIGENCE & INSIGHTS

CLIENT

Leading MNC in India ⟷ Businesses in Construction, Manufacturing, IT, and Financial Services

The client is one of the largest Indian multi-national firms headquartered in Mumbai, Maharashtra, India. The company has business interests in engineering, construction, manufacturing goods, information technology, and financial services, and has offices worldwide.

CHALLENGE

Huge effort due to Manual Reporting ⟷ Loss of opportunity cost because of delays

The company uses the Solman Dashboard to capture the SLAs and analyses for ticketing tool - L1 level (HR users) & L2 level (Development tickets) for SAP HR. This dashboard is readily available to be reported to senior management and ISO audit. The challenge for the company was to eliminate the tedious manual effort to prepare the SLA Reports from the dashboard with a large amount of data. There were too many delays because of the time consumed in this process.

SOLUTION

QlikView offers an enterprise-class architecture that meets the management and scalability needs of the most demanding organizations. It offers a highly scalable, secure, and manageable environment for interactive data discovery. QlikView can access, combine, and load data no matter where it is located, whether file based, on premise, in the cloud, or in big data sources. QlikView Server offers the power of the QIX engine for unrestricted, highly interactive analysis, scaling linearly to support large numbers of concurrent users and high volumes of data.

BENEFITS

Faster and interactive analysis of large data sets

Faster reporting

QlikView made it possible to interpret large volume of data with highly interactive analysis in quick time with visual and dynamic dashboards, apps and statistics. The organization also used the application frequently for reporting purpose that saved a lot of time for the organization on the whole. With QilkView implementation, at least 1.5 days of efforts were saved per man month in compiling & developing reports and presentations. Comparison reports for 2 years with any combination are now accessible to users with fill flexibility. The provision to slice & dice around with the data is given at multiple places & has made analyses easy for the users at the organization.

ABOUT QUOSPHERE

Quosphere provides innovative solutions in the areas of Business Intelligence, Big Data, Data Visualisation, Analytical Frameworks and Cloud Technology. Our services are focused on helping organisations translate the effectiveness of Big Data & Machine Learning technologies into great business impact.

We are a Qlik partner and have delivered multiple projects for our customers. We excel in bespoke solutions based on your requirements apart from end-to-end integration of connecting Qlik with enterprise data systems to help companies get the most value from their new and existing data.
